THE SAAVEDRA CONCESSION.

A most important proposal was sent to the La Plata legislature yesterday asking for a concession to build a railway from Bahia Blanca to Patagones, touching at Bahia Falsa, Bahia Union, and Bahia San Blas. The concessionaires ask for no guarantee, they merely apply for fifty leagues of fiscal lands at present nearly valueless, owing to want of potable water Nothing could be more plausible than the construction of this line and nothing more reasonable than the request of the concessionaires. The line is imperiously demanded by the inhabitants of the large zone stretching from Bahia Blanca to Patagones and should have been built years ago by the Great Southern Railway Company, had they been alive to the interests of the company and of the country.

It may be urged that a great part of the territory through which the proposed line will run is a barren desert, owing to the want of water, but there are many important parts of that country where water is abundant, camps are good, yet rural interests languish, owing to the slow and onerous means of communication. The whole coast line, for instance, between the Colorado and Rio Negro rivers and the road of the diligence, is to-day thickly stocked and populated. Fat steers and wethers are plentiful and cheap, yet owing to lack of rapid and cheap means of communication there is no market and the whole country is at a stand-still in those distant parts.

Years ago it was argued that those camps were worthless, the grasses too coarse, the soil too sandy, and droughts too frequent Yet in the course of four years we see a great change: in places where for years no water could be found, to-day wells are dug and an abundant supply of the precious liquid is found. Where in former years, there was a desert, not a hut, not a flock, not a herd, for leagues and leagues, we see to-day settlements at every half-league. The change has been slow, but steady—the natural result of the growth of the country and of the energy of private enterprise.

Bahia Union and San Blas bay are two excellent ports; in the latter there is splendid anchorage, great shelter, and the immense advantage of deep water up to the very foot of the hills; furthermore, in spite of what some member of the Department of Engineers has stated in an official report, there is a superabundance of sweet water on land right down to the tide-mark. All the neighbouring lands are occupied by hundreds of settlers with thousands of sheep and cows. Their interests clamor for a railway, and there is every prospect of the present concession being carried through in La Plata.

The concession is a natural extension of the Great Southern Railway Company and sooner or later, if the line be made, the railroad will be bought up by the great London company. There is an immense future in store for the far South, especially for the Rio Negro, and it is satisfactory to read in the Message to Congress that the President of the Republic is determined to connect the markets of the far South, its sheepfarms and estancias, with the seacoast. What was formerly a dream is now approaching reality, and we congratulate settlers in the South on their brilliant prospects, a species of redemption long-delayed, but at last at hand.

OUR TRAMWAY COMPANIES.

History threatens to repeat itself. Just as the mismanagement of railways, the utter disregard for the comforts and necessities of the travelling public, and the scandalous delays in the forwarding of the country's produce, brought on a long-expected and much deserved retribution, in the shape of a railway Inspection Bureau to correct abuses—just so the tramway companies are bringing on their heads the creation of a National Tramways' Inspection Bureau, to put an end to the sufferings of this patient and too-resigned public.

It would appear that the narcotic influence of yearly big dividends has lulled to sleep the senses of tramway companies. In their Rip van Winkle lethargy, hibernating on yearly 10 o/o returns, the Chairmen, Directors, managers, and shareholders are forgetful of the march of the world around them and of the requirements of that dull public which pays for those dividends and guinea-pig emoluments Year in, year out, we have preached, in the escort; we have suggested more humanity to the horses, more rolling-stock for the public, and less disregard of the requirements of those who are the bone and sinew of the yearly returns; but, in vain.

It is high time that the National Government appeal to Congress with a bill to put tramway matters aright by the creation of a board under the control and superintendence of the National Railway Inspection Bureau, to see that the line is drawn between the rights and duties of tramway companies. This is not only feasible, not only imperious, but it is a satisfaction that man and horse demand from their tramway masters.

The people of Buenos Ayres are tired journeying in open tramways at night in winter, tired of standing every evening on knife-boards to get to their homes, tired of overcrowding cars and over-burdening the game little horses who are fed to a certain point to stand "four years' work." The people are tired of cars with creaking doors, smashed windows, and wickless lamps; tired also of break-downs, from over-crowding, and brutalizing sights, such as horses dropping to the ground from sheer exhaustion, slipping under the cars, etc. The public cries Basta! and appeals to the Government for redress.

Let the tramway companies be brought to their senses and taught that they must supply cars for the traffic. Let all apologies for the lack of that rolling-stock be disclaimed; months ago, these companies should have ordered hundreds of new waggons to relieve the congestion of traffic; months ago they should have given orders for the purchase of fresh horses. Meantime, what have they done? Well, they may have done everything from buying buttons for the guards' coats to getting out a new patent for punching tickets, but they have done absolutely nothing, or next to nothing, to meet the requirements of traffic.

It is sheer nonsense to state that such or such a company have ordered new cars, purchased new horses, but that the traffic grows too quickly for them. It is the bounden duty of these companies to the public to meet that growth of traffic, to anticipate it, and be fully equipped in all circumstances. Let there be an end to the daily sights of overcrowding, and since common sense, a consciousness of their own interests, does not prevail on the companies to reform, well, then, let the Government step in and protect the interests of the public. More of this anon.

LONDON LETTER

(*From our own correspondent.*)

April 13th

And a very short one. Political affairs fiz up and go out, and the smoke goes all ways; but the unseen activity is intense, and at any moment the glare may be bright enough to show us where we are. Financial matters are in a dull prosperous state indicating improving trade and a tolerably easy money market. The most interesting item in the financial journals and morning paper money articles is the reproduction of your article headed "A Halt." The *Statist* and the *Standard* pounce on it, but add little or nothing to your own expressions of astonishment at the bareness of the resources of the Argentine Government in the European banks. The *Statist*, wise after the fact, was quite sure the failure of the Comptoir d'Escompte would hit in unexpected places, and, lo! the Argentine has had to take up bills to the tune of half a million sterling to get its railway securities out of pawn, and so on. To say more would be to simply reproduce your own article. You are constantly turning up in one way or another. I see Sir Thomas Farrer, in his crusade against the government Sugar Convention, mentions amongst other possible evils of a reactionary and stupid measure redolent of the Conservative vice of legislating for particular interests, that in carrying out our retaliatory policy against bounty-fed imports we shall have to place countervailing duties on the frozen meat and other produce of that fertile region, the Argentine Republic.

We have news from this day's date from Sidney. I do not know how far your own telegraphic dispatches enter into details, but I think it worth while risking a "fiambre" for the benefit of our German friends, who will be glad to know that the Olga had been floated, and having sustained only slight damage, she left Apia for Sidney where she has safely arrived. The commander, two officers and 30 men of the gunboat Adler, and the surviving officers of the Eber arrived in the Lubeck, and will proceed to Germany in the Habsburgh on the 24th inst. A guard of 100 men has been left at Apia to protect German interests. The hostilities among the natives of Samoa had virtually ceased, and King Mataafa had dismissed the bulk of his army. The Captain of the Adler says that Mataafa's followers at first refused to offer any assistance to the German sailors and confined their efforts to assisting the shipwrecked Americans. By order of their chief, however, they subsequently changed their minds and succoured all they could, both Americans and Germans. The American corvette Nipsic, though afloat, is entirely useless. The total number of lives lost in the hurricane was 143. The steamer Rockton leaves Sidney for Samoa to convey to San Francisco the survivors of the crews of the American vessels which were wrecked.

Lord Rosebery, who, 'inter alia,' observed that the Unionist party 'wants repainting,' said also that the Parnell inquiry is coming nearer and nearer to Her Majesty's government. His words have just received a startling verification. The Irish members, who are assisted by a whole nation in passive rebellion and have eyes everywhere, have unearthed a police circular marked "very secret"—the text is published—asking for a list of all Leaguers—"Land" or "National"—who since 1879 have been convicted of agrarian crimes. Mr. Stuart questioned Mr. Balfour on the subject. The Irish Secretary refused to reply in reference to a document which, if in existence, must have been surreptitiously revealed. On the motion for the adjournment of the House to the 29th inst Mr. Parnell himself re-questioned Mr Balfour on that subject as well as upon the Donegal evictions; but "Old Morality" came to the rescue and closed the debate in the faces of the Irish members. Never mind, it is all going right. In the eyes of honest men uninfected with the coarse anti-Irish humours that make lepers even of amiable bankers and merchants like Lubbock & Co., the Government and its one idea, coercion, are for ever discredited, not for their opinions or for the rights and wrongs of their political panacea, but for the mean shifts, the calumnies and personal mendacities the ministers have descended to when attacked. Your Irish readers will be interested in a review of Mr Froude's new novel "The Two Chiefs of Dunboy" in to-night's *Pall Mall Gazette*. In alluding to the work last night, I think I said the scene was laid in the 17th century, I should have said the latter part of the 18th, a much more stirring and interesting period in Ireland.

I have just discovered that the *Financial News* pays you to-day a high compliment. In quoting your celebrated article "A Halt" and your prophecy that the premium on gold would rule high, it says "This is the opinion of a leading Buenos Ayres journal which seldom defiles its own nest; and the correctness of its facts and anticipations is proved by the fact that since it was written the premium has gone from 59.20 to 64!!

Your contemporary the *Financial News*, which I have had the honour of backing from its recent birth upwards to its present commanding position, is not a very sound economist according to our Smith *cum* Mill and the rest English notions, but in this instance the *F. N.* agrees with Sir Thomas Farrer and all orthodox writers who hold that, saving the mere money market and temporary demand influencing discount rates, the price of a metallic currency does not depend upon demand and supply, liable in these days of quick transit to instant and continuous change of conditions, but upon credit. That is to say, as we all know and do not always say, "a premium on gold" means your paper is at a discount, or as the *Financial News* observes "the Argentine Government is in straits. Hence the difficulty. I am glad to see the *Standard* taking correct views on the currency. Your adopted countrymen are a very clever and self willed people, who as you seem to tell them require hard knocks to teach, and they will probably get them. Beyond mercantile technicalities there is absolutely no difference between a cedula, a paper dollar, and a bill of exchange. Merchants know how to treat bills. If they view a currency in the same light they will never err. The only difference, and it is not one of principle, is that a paper dollar is pig upon pork. The drawer and drawee are the Government.

PARIS LETTER

(*From our own Correspondent*)

April 11th.

"Exhibitionism", like Aaron's rod, has swallowed up all the other items. The change is delightful, and enables the public mind to carry out its firm resolution to secure the success of the World's Fair. Another happy event to record is the prorogation of the parliament till the middle of May. Since its convocation in October last, it has done no practical work; its time was passed in personal debates, party recriminations, and mutual upbraidings in which the country took no other interest than to deplore the neglect of its wants. The parliament of 1885-89, will go down to history as the "Addle Parliament."

Perhaps the best statesmanship President Carnot could display would be the resolve to exercise his rights of prorogation of the Chamber till August, when the latter becomes legally defunct, the two months preceeding the general elections. The people are fully aware their legislators cannot achieve any effective work henceforth; and the legislators are quite cognizant they are unpopular and not in touch with their constituents. Hence, the necessity of a truce, of a compulsory lotus-eating life of six months' duration. That pause in scalping, anathematizing, and excommunicating, will allow the benefits of the Exhibition to grow, blossom and mature.

Respecting the Senate High Court of Justice, it causes no sensation. The public fully comprehend the quarrel between universal suffrage and the politicians it is likely to sweep away. Then it is very difficult for even outsiders to arrive at a clear conclusion respecting the new Judicial Machine. Very able lawyers, outside as well as inside the legislature, call in question the constitution of the Court. Similar dissidence exists over the act of accusation against General Boulanger. Stripped of legal jargon, there does not appear to be in it the elements of the high treason which the Code defines. In other words, presuming the charges can be proved, lawyers say, the articles of the Code quoted do not apply to the indictment when Galen says "yes", and Hippocrates "no", what can simple people conclude?

The Court labours under the disadvantage of being a political body, with Rhadamanthuses chosen from the political antagonists of the accused. Then all political trials are like a two-edged sword. Boulanger has notified that he is prepared to be tried before a jury of twelve of his fellow countrymen, or even the same number of members taken from the judicial Bench. Further, the break-down for, such it really was, of the state prosecution against the "Bosses" of the over-rated Patriotic League, has generated doubts that the government may turn out to be equally rash in striking at Boulanger. It must seek to prove its case, not before a court of nine senators, but before the nation, with the eyes of Europe looking on. If it can be proved, up to the hilt, that Boulanger has endeavoured—as he stands accused, to tamper with the loyalty of soldiers and the fidelity of functionaries, his sun is set; he falls like Lucifer, this time—never to rise again. For the public, all the other counts seem to be but leather and prunella.

Between adversaries there is not much toleration and less of fair play. As for chivalry, the age of that is gone. But France remains, and will survive the rage of parties and the blunders of politicians. It is said that counsel can attend for the absent accused, and contest the legal objections. But can there be any appeal? Senator Renault, a sound lawyer and anti-Boulangist, has stated, that if Boulanger delivers himself up on the eve of the elections, to purge his sentence, he becomes eligible to pose his candidatnre for deputy. No one seriously believes that after the general elections in October he would be kept in prison. This feeling detracts from any finding the Senate Court may render.

At Brussels, General Boulanger lives prudently. Rochefort and Count Dillon, will share his strategic exile. In the meantime, the General's lieutenants and journals are resolved to keep the ball going till universal suffrage arbitrates who is to govern France. Neither side either asks nor gives quarter. The public does not share in the hurly-burly of the daily pitched battles fought in the newspapers, because it has its mind coolly and resolutely made up. It is more to be hoped than expected, that the October elections will effect a salutary—permanent would be too much to anticipate—change in the home political situation. It is believed that the present form of government will not be changed, but that new, tolerant, and business-men will be entrusted with the affairs of the country.

There is not the slightest rumour of war, or European complications. A kind of side-attention is given to Panama and the Comptoir d'Escompte. The former company having discharged navvies employed on the Isthmus, is now dismissing the clerks here. The clerks have petitioned the Bankrupt Court to be awarded some compensation, but the Assignee objects to any privileged creditors. The Comptoir d'Escompte is deadly sick. The project to form a new Discount Company on the ruins, and with the relics of the old, has fallen through. Bankers will not object to lend cash, but, what is more important still, will not lend their names. In fact, the bankers have no great interest in putting the old Comptoir on new legs, because they all may reasonably count upon obtaining a slice of its business. But it is in her colonies, in foreign countries, that the collapse of the Comptoir d'Escompte will hit France most. After all the assets are realized, they will be insufficient to repay the advances of the Bank of France, it is calculated, by some five millions francs. This may lead the Bank of France to take some action against the administrators, what an independent group of 160,000 shareholders are doing. As a majority of the administrators were only honorable ornaments, they have not much substance to yield to the victimized creditors. Guinea-pigs in France rarely receive more than 25 to 50 per cent presence-counter. Some only have such doles to live on. History records that one guinea-pig, by multiplying himself, made an annual income of 60,000 francs. It is calculated that all the administrators of the financial establishments of Paris do not exceed a ring of one hundred. Besides, the counters of presence or 'getons', the giunea-pigs obtain some pickings on the bringing out of new loans, due to "straight tips". To secure this they must be adulators of some Golden Calf.

There was nothing very extraordinar in M. Chevreuil dying at the age of 103. The singularity was, that he lived so long, and all his days—since 17 summers—in Paris, where life is said to be of so short duration. He is represented as having witnessed the taking of the Bastille. He does not remember the fact himself, being under three, and his nurse is not to the fore to certify about the subject, having long ago joined the great majority. Besides, he was in the provinces at the moment, and remarkable man though he was, he could not be in two places at once, like Sir Boyle Roche's bird. He was kept alive really on flattery and flummery. His "only boy"—a grandfather aged 72, died a fortnight ago; the fact was naturally concealed from the Nestorian. Chevreuil worked his way up the ladder of life himself. Industry and chromatics owe him large debts for his chemical discoveries. These he threw open to mankind; never patented them, that is to say, farmed them, as Pasteur does his. The State might well expend 10,000 francs on the man that disinterestedly enriched his country—and industrial art and science—with millions. He not only discovered gamuts of new colors, but invented candles to perceive them. He had long ago entered upon the seventh age of man. Of no distemper, of no blast he died: his extra years ran on,

"Till like a clock, worn out with eating time,
The wheels of weary life at last stood still."

His name figures on the glory scroll of geniuses round the first storey of the Eiffel Tower. The old man up to a week before his demise, when there was no death-scythe in the air, would drive over to look at his name, in letters of gold.

Nothing can exceed the lightning efforts of all concerned to "wash and brush up", in and around the Exhibition. It's a "thing of beauty", but cannot be a joy for ever. Even satiated World's Fair's trotters will find fresh sensations and new pleasures in the present. You feel it is an organized concentration of agreeable surprises, where the eye is delighted everywhere it rests. Later, the mind's eye will be instructed. It is curious to note the Jack in the Box changes twenty four hours produce in courts, pavilons, and gardens. A waste spot yesterday is to-day a smiling garden, with snow-white statuary compelling admiration, for there is no gingerbread. And no matter where you walk, ride, or repose, you encounter something new, or things done in a new way; they never were so done before. But what will it be in the leafy month of June, when the flowers are like Solomon, arrayed in all their glory; the Picture Galleries in full swing; the fountains in full dash and splash-illuminated by prismatic and electric lights at night, with restaurants crowded with merrymakers, and all going merry as a marriage bell? I am sorry the Argentine Republic's pavilion is not more advanced, but it is to be hoped, now that the Vice-President of your Republic has arrived, that he will keep all concerned with noses to the grinding stone. The Mexican Pavilion, is a wonderful example of how to make up lee way. The Courts generally are being fitted up with stalls, and trains keep puffing through the galleries, with cases upon cases of goods. The Exhibition is positively a city of Marvels, and an Aladdin's Palace.

A BATTLE ON FREE TRADE.

TURNING THE TABLES.

Antibes, April 6th.

Next week, after an interval of 37 years, an attempt will be made by the Tory Government to galvanize the protection mummy. Tories have beheld the greatness of England grow and expand under the auspices of Free Trade, but hate its principles and name with undying animosity. An attempt, therefore, will be made under the ambiguous name of the Sugar Bounties-Treaty to strike a blow at Free Trade by imposing duties upon sugar imported into the United Kingdom from France or other countries that give bounties on beet-sugar. There is no question that French sugar has annihilated our sugar-refineries in England, and thrown some ten or twenty thousand hands out of employment. But it is equally certain that some 37 millions of people have thus been provided with sugar at a half-penny per pound cheaper than we could produce it in England. Our consumption averages 70 pounds per inhabitant; the saving, therefore, averages 3 shillings per head, or £5,500,000 per annum, which is the same as if France consented to pay Great Britain a tribute of that amount yearly towards the maintenance of her army and navy. France, in effect, sells us sugar at a price below the cost of production, and taxes her people in order to give bounties to her sugar-growers, to cover the difference.

The Tories know as well as any of us that it is a great gain to England and a loss to France as long as this system holds. French economists, such as Leroy Beaulieu, have frequently pointed out its absurdity, and the French Government are of the same opinion; but the beet-growers and farmers are powerful in the Legislature, and if the beet bounties were to be abandoned the whole Protective Tariff would have to go overboard. It is the very essence and nature of Protection that if one class or one industry be favoured others will clamor for like privileges, until society is bound hand-and-foot in a chain of one hundred links. It is not for the sugar-refineries that the Marquis of Salisbury, the Dukes of Norfolk, Bedford, Rutland, Richmond and other British nabobs care, but they hope that a duty on foreign sugar may lead to one on foreign grain and foreign meat. It is the thin end of the wedge.

Mr. Gladstone has sounded his trumpet call to Free Traders in and out of Parliament, and the question will be hotly disputed in the Commons. The Government has a compact majority of 70, who will vote anything; they would vote to-morrow to behead Gladstone and Parnell on Tower-Hill if they were asked. The Liberal Unionists were always Free-Traders, and it is even stated that Chamberlain is going to vote against the proposed Bill, but nine-tenths of them will support Lord Salisbury because they know that if his Government goes out of office they have no chance of being re-elected. At the last General Election they vowed by all the gods that there should be "no coercion in Ireland", and having cheated their constituents they dare not face them. At present the Salisbury and Gladstone factions in the House of Commons are about equal, the Government majority consisting of the 70 Liberal Unionists. On these men, therefore, the Sugar Treaty stands. If they recant all their life-long principles of Free Trade, which is almost certain, Lord Salisbury will obtain a signal triumph over civilization. The principles of barbarism, which are in every country identified with protection, will be again paramount. Next year we may hear of a duty on grain or frozen meat.

But all this is legislating on a volcano. The English people will not be trifled with If Parliament attempts to carry out these taxes on food, to turn back the hands on the clock, you will see an outburst of popular feeling to which the Chartist riots of 1848 were as nothing. The blindness of the Tories is such that they think they can do as they like because they have a majority in the House of Commons. We run, happily, no risk of a revolution with bloodshed, but we shall perhaps see a popular Coup d'Etat as when the Hyde Park railings were pulled down, in 1864. All this will result in triennial Parliaments and the reform or abolition of the House of Lords. The recent County Council Elections in London were as a hand writing on the wall.

Some two years ago Boulanger, then Minister of War, prevailed on the venerable old humbug Grévy to sign a decree banishing the Duc d'Aumale and other Orleans princes. Last week the Duke was received in state at the Elysée by President Carnot, and Boulanger is in exile at Brussels. Such is the irony of history. But it by no means follows that the wheel of fortune may not by another turn bring Boulanger again to Paris and send His Royal Highness back to England. My impression of the two gentlemen is probably shared by many, that they are a pair of schemers. None of the Orleanist princes are men of superior talents suited to guide a nation's destiny in such critical times as surround France, but D'Aumale is probably the cleverest of them. Seeing that he has no chance of the throne, with the Count de Paris and his sons between, he has taken up the Republican programme and seems to think he may some day be elected President. Perhaps if he were president he would be tempted to try Louis Napoleon's game. On the other hand Boulanger, in whom cunning takes the place of genius, thinks that France will make him Dictator for want of any better candidate.

It must be, apparently, a race between the two, and I feel inclined to back Boulanger. Never before in France was there such a dearth of able men. Goblet, Ferry, Carnot, Freycinet etc. are mediocrities, very good as prefects of a commune or ordinary business men, but very different from Richelieu, Colbert, Locqueville, Montalembert, De Morny etc. Hence the prominence of D'Aumale and Boulanger, which is a lamentable proof of the decadence of France.

At present the Duke seems to be winner. There are rumors that the Belgian Government will expel Boulanger, on the plea that he is intriguing against the French Republic, which is a breach of hospitality. In that case he would probably go to England, and perhaps figure for a season at London drawing-rooms. The London papers speak of him as a fallen star, but his popularity is not to be so easily extinguished. It has its origin in the wretched financial condition of the country, and will last until this be remedied, which is impossible under the present system. It is now nearly 10 years since I pointed out the disorders of French finance, consequent on Mr. Freycinet's declaration, that "the more money a Government spent the better, as it went back to the people." Taxing 38 millions of citizens for the benefit of half-a-million persons interested in contracts was his idea of good government. We see the result.

There must be a clean sweep of the present class of "statesmen", and this will be at latest in October, when the general elections take place. All classes of Frenchmen desire to postpone their grievances till after the Exhibition, and then it will be a regular, ding-dong fight. If Boulanger comes to the top d'Aumale must run, and vice-versa. The former has one thing in his favour, that he spends money freely, whereas d'Aumale is said to be parsimonious, notwithstanding his recent gift of Chantilly to the French Academy. Everybody asks where Boulanger gets all the money; his friends claim that every post brings him dozens of registered letters containing bank-notes of fifty or five hundred francs. This is another strong proof of popularity. The Government, however, profess to believe he is in the pay of the Count of Paris; others say that an American widow is at his back.

AN IMPORTANT RAILWAY SCHEME. PROPOSED LINE FROM BAHIA BLANCA TO SAN BLAS AND PATAGONES.

Our La Plata exchanges yesterday gave full particulars of a most important project which should have been carried out two years ago. We allude to Messrs. Saavedra and Co's. scheme for a broad-gauge railway from Bahia Blanca to San Blas and Patagones. The line would moreover touch at Falsa and Brightman Bays. The proposed railway is the natural extension of the Great Southern Railway, whose London Board should have conceived the scheme long ago. As the project now stands, it is most favorable for the province, since no guarantee is required, and the applicants merely ask for 50 square leagues of State territory. The plans and surveys would be completed within 6 months, and it would not take very long to build the line, so many and so great are the advantages afforded for landing material. In San Blas, vessels drawing over 24 feet of water can come within a few yards of the beach, which is a shelving one. So that there is even no necessity for erecting a provisional wharf. The kilometric cost would range from 19,000 to 23,000 dollars gold. The facilities for construction and the prospects of this line are so great that the wonder is, we repeat, the scheme was not proposed and carried out long ago.

The same gentlemen have another important project before the La Plata Legislature viz; a line from La Plata to Pringles, crossing the Southern Railway at Gandara and joining the Moituer concession. The line would have a length of 472 kilometres, and a branch from Gandara to Ayacucho, joining at this point the Olivier concession. Length of the branch 192 kilometres. Estimated cost 16,000 dollars gold per kil.

We may add that it is more than probable the two projects will pass through the Chambers this session, in which case the first section of the Bahia Blanca-San Blas and Patagones Line (50 kilometres) will be opened to traffic in 1891.

Mr. James Temple, who holds a concession for a narrow gauge railway from this city to Rosario, has protested against the Central Argentine tracing, which, it appears, seriously interferes with his plans.

Here is something about the vacuum brake. The clipping is from a London paper:—

"With regard to the railway accident on the Manchester, Sheffield and Lincolnhire Railway at Penistone, on Saturday, we learn that both the excursion train and the mail train were fitted with the automatic vacuum brake, and there can be no doubt that it is largely owing to this fact that the accident was not so serious as it would otherwise have been. In the case of the excursion train, the moment the couplings became disconnected the brake was applied throughout the whole of them, and so prevented the carriages in the rear from running into those at the front, whilst in the case of the mail train the driver applied his brake the moment he saw the signal against him, and was enabled to stop his train in a very much shorter distance than he could have done with any other form of brake, the action of the automatic vacuum brake being very much more rapid than that of the brakes hitherto in use. The Manchester, Sheffield and Lincolnhire Railway Company, we learn, are as rapidly as possible fitting the whole of their stock with the automatic vacuum brake."

Following up our remarks on the report of the Rosario railway, we append a few figures, which will be found interesting:—

At the last meeting of the City of B. Ayres Tramway Company held on the 29th March, the following resolution was unanimously passed:

"That the capital of the company be and is hereby increased to £540,000, by the addition of £60,000, divided into 12,000 shares of £5 each, to the intent that such shares may be allotted among the existing shareholders, as far as practicable ratably according to their present holdings, at the premium of £3 per share; and that such shares respectively be credited as paid up to the extent of £5 per share in respect of the sum of £60,000 expended by the company upon capital purposes, for which the contingent fund has been temporarily available."

The chairman mentioned that the proposed issue of new shares would require £6,000 more of annual net revenue to enable them to pay the same dividend as at present.

The Deputies have sent Messrs. Methven and Guerrico's project, particulars of which appeared in our edition of yesterday to the Engineers' Department, which will report on it.

Messrs. H. Meincke have requested Minister Pacheco to forward to Congress their project for the construction of a subterranean passage in the Avenida de Mayo, for railways, stores, etc.

There was very little doing in the N. R. Board Offices yesterday. A report was received from Inspector Fay, who says that the delays on the Central Argentine did not amount to anything last week. The Rosario Railway, however, was a sad offender during the week. Mr. Fay says that both companies are doing away with mineral oil and are now beginning to use less dangerous stuff. The Central Argentine has taken to candles, and the Rosario Railway to vegetable oil. We see in the report that 600 of the Rosario wagons are delayed on the Andine and Argentine Great Western. There are an equal number delayed in Cordoba, and farmers are at their wits' ends to know what to do. In the meantime they are suffering much pecuniary loss.

The kilometrage run by the Enseñada Line in March was: Locomotives, 64,061; carriages, 346,158; wagons, 78,940. Total 589,159.

EDITOR'S TABLE.

Galveston sent us a line yesterday to say that the cable between Payta and Santa Elena had fainted, so our readers will have to breakfast to-day without any further news about Czars or Conferences, strikes, Shahs, Socialists, or Samoan muddles.

Ferrari's opera company opens to-night in the Calle Corrientes house with "Mephistopheles," nearly all the crack artists on the stage, "Grand complet" of wealth, beauty and fashion, of course.

General Santos's remains were interred at Montevideo with great show. The ecclesiastical authorities refused any religious offices, President Tajes was present.

The National Deputies did not meet yesterday, as half of them took the train for Cordoba to attend the installation of Governor Juarez. Most of the Senators probably followed suit; so the "collective wisdom" will probably not be heard of again till next week.

The Rev. Mr. Stockton's lecture at the American Church on Monday, for the Young Men's Association, was very interesting. There were over 150 people present, mostly English-speaking. The Rev. gentleman is a pleasing and powerful lecturer, and his audience expressed a decided wish to hear him again as soon as possible.

Messrs. Meincke and Co. want to do a little rabbit business under the new Boulevard, and have applied to Congress to make a tunnel, lay tram and railway tracks therein, and do other fearful and wonderful underground things.

We have now on sale at our office a supplement containing President Juarez's Message to Congress in full.

Lovers of the manly art of self defence have a treat in store. A well known American combination of wrestlers and boxers will give an entertainment at the "La France" Hall on the 23rd inst. Further particulars will be duly announced.

Oh! ye gods. The musical public of Buenos Ayres, (if there is such a public worthy of the name) did not appreciate the greatest music ever written—"the opera of operas!"—Don Giovanni, given at the Politeama on Tuesday night. This is the same story as 17 years ago when we were in an almost empty house to hear the sublime composition: Verdi's noise, Boito's catching chords; Donizetti's sensuousness have spoiled our "mixtum-gatherum" public for the unequalled productions of Mozart's genius. Even imperfectly performed as the greatest of operas was on Tuesday night, it was a treat for those (how few) who know its perfection. We heard long ago the "immortal four"—Grisi-Mario, Alboni and Lablache, in this opera (we forget who played the Don—there has been only one *perfect* Don, Tamburini) and, even judging by this high standard, the performance of Tuesday night was a creditable one. Blanchart looked and acted the noble roué well, and really deserved the faintly supported "encore" which some critic in the upper regions started for the "deh vieni alla finestra"—the most beautiful serenade ever written; but "Finch al del vino" was too much for him Marcassa (Leporello) was below the mark in "notte e giorno", but very near it in the immortal "Catologo". The unequalled trio of maskers was fairly sung, and de Lucia, as the namby-pamby Octavio, sang "Il mio tesoro" beautifully It is needless to say that Madame Patti as Zerlina was Mozart's perfect conception of the character. The orchestra wants a deal of working up; but it was evident that the conductor, with finer materials in his hands, knew what he was about as well as Sir Michael Costa or Benedetti. "En fin", our cosmopolitan public, in receiving so dubiously the performance of Tuesday night, is either incapable of appreciating the greatest of operas when fairly performed, or has formed an ideal of it difficult for artists to reach.

Another dreadful crime, a double murder, was announced yesterday. The scene of the tragedy was the residence of the Cambaceres family in Avenida Montes de Oca, Barracas. The family went last week to their estancia, leaving two young Spanish women in charge, and on Monday morning, at 4 a. m., they were butchered in their beds by a man (also a Spaniard) whose importunities one had rejected, as he was her stepfather by marriage. There is a long tale of vice connected with this terrible crime, too repulsive for our readers. The murderer escaped over the wall but he is well-known, having made no secret of his murderous intentions, and he can hardly escape the pursuit of the police. But of what avail to society will his arrest be? Capital punishment—the one effective check on life-taking—is a dead letter, and so long as it remain so, murder must and will increase in this country; and of late it has been increasing in the most appalling manner.

The Austro-Hungarian Consulate is now in the very competent hands of Mr. E. Lavarello, during the absence of the Consul, Mr. Mihanovitch.

Subscribers who think of visiting that frozen-mutton town, San Nicolas, should take a supply of hot rolls with them, as the bread made there is said to be uneatable, and the citizens are thinking of trying tar and feathers on a few leading bakers—'pour encourager les autres.' A new summer town on the river, where the San Nicolasians can bathe, is in incubation.

Juarez and Tandil had some more unpleasant cyclone experience last week. Amongst other damage done was the wetting of hundreds of sacks of maize and wheat lying at the railway stations in the district. The rain was, in fact, very heavy all over the south. Bahia Blanca was drenched, and the dirty Naposta overflowed in a very alarming way for several hours. We have not yet heard how the Irish Colony fared in the emergency.

The very latest fashion in dogs is to shave the hair off the poor brute except a ring about the neck, legs and tip of the tail. Bangles and bracelets are put just above these rings, with a broad, engraved collar of gold or silver to match.

Our Rosarian friends appear to be going in vigorously for football on Sunday, in spite of the question put by a shocked new arrival as to whether they would dare to do so in England? Football is a decidedly innocent and healthy amusement, quite within the bounds of the Decalogue. On Sunday Roldan played Rosario and won again, though the Rosary men were miles ahead in the scrimmages, losing by their bad passing. However, both sides on the whole showed very creditable play.

Another North Pole Expedition by a Swedish Australian is announced. It's all gammon. The only way to reach that point of the globe is in a balloon, and it will be done some day, and perhaps soon.

A good many influential people are taking kindly to Mr. G. Cortinez's proposal for a grand International Exhibition here in 1892. It would certainly serve to bring the country prominently before the world: and by that time it may fairly be expected that the run from Europe to the Plate will be reduced to fifteen days. If a few stray Royalties from Europe, not wearers of crowns, of course, but heirs apparent, including the jovial and genial "Tum Tum," some Archdukes and Royal Highnesses, could be coaxed out to the Show, it would be the biggest "bombo" possible for the country. This Argentine Exhibition will probably be amongst the last things of the kind on earth, the end of the world being now so unpleasantly near—March 5th 1896.

The man who wrote "Nothing is impossible" never tried to find the pocket of his wife's dress when it was hanging up in the clothes-press.

Land speculators should keep at least one of their eagle eyes on the big sale of 180 leagues of Government land in the province of Salta on the 15th of next month at an upset price of 1000 nats the league. The railway from Resistencia to Oran will cross these lands. The Salta Government is making the usual wretched mistake of selling the public domain in big blocks to greedy speculators, instead of to tillers of the soil, "a country's pride", which the g s's can never aspire to be called.

They must be woefully hard-up in both money and credit in the Interior, where not a single man can be found who is flush enough to lodge 100 nats as security when a candidate for the lucrative Government appointment of letter-carrier. The P. M. G. has consequently been obliged to abolish this security when looking out for postmen.

The proposed new railway from Bahia Blanca to San Blas and Patagones cuts the legs from under the Southern Company again. Cannon Street, where art thou and thy brains? Years ago we told thee to go South as far as the land stretches.

The artist who painted the drop-scene for the new theatre in calle Victoria threatens to upset the theatrical coach in that quarter. It appears that a surgical operation cannot get the price of the curtain out of the proprietor of the theatre, and the painter has applied to the Courts to allow him to take it away. A stage without a curtain would be an amusing novelty.

The City Improvement Company complain, and with good reason, of the mud and dirt of the streets being swept into the sumpts by the Municipal scavengers, no doubt to save the trouble of carting it away. This is monstrous. Of six thousand sumpts, two thousand are choked with mud and filth. It is only in this city that such things occur. The Company has over and over again protested, but without avail.

A gay and festive Gaul has imparted a "nota alegre" to La Plata life by starting a music-hall, or Pasatiempo, there, and lots of rows may be expected. A local colleague has most unfairly told wives and mothers in-law all about the place, and where to lay their hands on husbands who are unavoidably "detained at their offices by a press of business" till one or two o'clock in the morning, or perhaps all night.

Here's a chance for any emigrants looking out for a "soft job", as our Carmen de Areco correspondent aptly puts it: No fewer than 3,000 navvies are wanted for the Uruguayana Railway in Banda Oriental.

None of the plans for the Bolsa Hospital are up to the mark aspired to by the "glory of the Republic". The Committee met on Tuesday night and decided that none of the plans sent in deserved the first prize promised; but the second and third prizes were awarded. We really thought the republic was bursting with architectural genius (though a look at our streets might perhaps shake this opinion.) Where has it gone to?

The Swiss Gymnastic Society intend to celebrate their fourth anniversary, on the 7th of July, with a big jollification, of which further notice will be given before the time comes.

The mild Hindoo is elbowing Johnny Pigtail out of his own special province—Tea growing. Mr. Goschen's Budget presented last month to Parliament shows the consumption of Indian tea is increasing and that of China falling off, as the former is stronger, and a cup that cheers can be got out of a less quantity. If Excise figures are any guide, John, Pat and Sandy are gradually and wisely working themselves down to be "moderate drinkers' of wine and spirits. It appears that they are going in for light foreign wines, which their fathers and grand-fathers had such a rooted and supreme contempt for.

The sad news was wired from Montevideo yesterday that General Santos's widow is quite broken down under her bereavement and is very dangerously ill.

Las tierras que componen este Centro son inmejorables; lo mejor de Castelli. 326 solares, 40 quintas y medias chacras
34 chacras y una fraccion de Estancia
CON POBLACIONES.
Para todos los gustos y todas las fortunas.

¡Atencion!
EN LOS DIAS
30 de Mayo y 2 de Junio
A LAS 12 DEL DIA

Procederemos a vender en remate publico y en los mismos terrenos, el numero de solares, quintas, y chacras que se dejen espresadas, que constituyen el famoso campo que fue de doña Maria Faulkes, hoy del Consejo General de Educacion de la Provincia.—Por orden judicial dictada en el juicio sobre o sacion de condominio seguido por el Consejo General de Educacion de la Provincia.

Este campo que constituye ejido del pueblo de Brandzen, se reputa:—El mejor partido, el mejor del Sud, el mejor de la Provincia.

El que lo conozca, admirirá esto sin reserva; y el que no lo conozca, que se informe y confirmará la aseveracion.

Se encuentra cortado por dos vias ferreas, la del Sud y la de La Plata, se halla trazada otra para el Monte; se proyecta un mercado de frutos, un tramway a Chascomus y se establecera alli la estacion principal de la empresa que ha presentado al superior Gobierno el proyecto de una red de ferro-carriles de la Provincia. Hecho esto Brandzen tendra como ningun partido, cuatro vias ferreas y un tramway. Fijarse: Cada comprador sera dueño de dar a su terreno el destino que desee, pues esta operacion no esta sometida a las condiciones con que el Gobierno vende los terrenos de ejido. Grandes ventajas—La venta se efectuara: una tercera parte al contado y las dos restantes a plazos de 3, 6, 9 y 12 meses con la garantia hipotecaria del mismo terreno y con el interes de ocho por ciento anual; cuya hipoteca podra chancelarse antes de su vencimiento si los compradores lo pidieren, pudiendo sustituirse por otra de mas largos plazos en los Bancos Hipotecarios de la Provincia o la Nacion.

Observar—Que el pueblo de Brandzen segun el mapa del Estado Mayor del Ejercito Nacional se encuentra situado a doce leguas y fraccion de kilometros de la Capital Federal, o sea una distancia igual que la ciudad de La Plata. Erte campo esta señalado para la agricultura, tambos, pastoreo de invernada y establecimientos industriales. Por lo espuesto puedo afirmarse que Brandzen es y sera una situacion industrial y comercialmente Estrategica. Este es un hecho real y evidente que puede palpar todo el que entienda de negocios. Tasaciones bajisimas. Los solares se encuentran tasados á cinco, nueve, quince, veinte y veinteicinco centavos el metro cuadrado. Las quintas y medias chacras a 4oo y 5oo pesos m/n la hectarea. Las chacra a 2oo, 25o, 35o y 4oo la hectarea, Y la fraccion de Estancia con edificios a cuatrocientos pesos la hectarea. Las dimensiones de los solares, quintas y chacras constan de los planos que los interesados podran pedir en nuestra casa de remates y en los demas puntos que mas adelante indicaremos,

Para esta grandiosa venta: Tomaremos como base las dos terceras partes de las tasaciones respectivas de donde resulta que se vendera tirado y escepcionalmente barato, siempo la venta forzosa por tener que liquidarse el condominio.

Advertencias — Devidamente autorizados exijiremos al firmarse el boleto el diez por ciento en seña a todos los compradores admitiendo giros contra Bancos. No habra escepciones. Caso de lluvia se transferira el remate para el dia de fiesta siguiente.

Por referencias y planos ocurrase en La Plata, nuestra Avenida 7 entre 49 y 50, Juan A. Carbonell y Cia. B. Aires. estudio del Dr. Luis F. Pintos. Rivadavia 5 5 n|n. Brandzen, oficina del Escribano D. Rufino M. Martinez, quien autorizara todas las escrituras. Los interesados pueden tomar los dias 30 de Mayo y 2 de Junio en la capital tren que sale a las 7.50 y 8 2o de la Estacion Constitucion y de La Plata el que sale a las 7.35 a.m.

Escusamos decir que los titulos son garantidos porque los que nos conocen deben tener la seguridad que al encargarnos de esta operacion hemos revisado todos los documentos. 191 m8 ju2

Payments 10 per cent every 3 months, like a Savings Bank.

This is the most important and indispensable Industrial Undertaking of the country, and the one which offers the largest prospect of profit to its shareholders, from the opportunities it possesses of obtaining concessions and purchasing forests, of the richest and strongest woods requiring only the hand of the practical and scientific man and the power of capital to create the means of transport and economical manufacture, sales being sure, remunerative and easy in this Republic, as well as in Uruguay and Europe, in consequence of the natural requirements of Industry and Building. No business man or capitalist should delay subscribing, for his own and his country's sake, freeing us from the enormous annual tax of $12,000,000 now paid by us to foreigners for woods inferior to the Argentine.

There was a species of revival in the National Bank Share speculation to-day, all the more satisfactory as, for the past few days there was a marked disposition amongst dealers to hold back. The quotations flared up to 254 for end of month and closed firm at 253.50, and it is reported that there are no sellers at any rate under 254, and even at this sellers are by no means numerous. The situation is thus sensibly improved, and apparently on the high road to further advance. Confidence, which was at a low ebb, may be considered almost fully restored. As to the other stocks, the movement is decidedly lacking in vigour, due, it is thought, to the interests centred in National Bank Shares; but quotations keep fairly up. Constructors advanced to 134 and closed at 133.50 for cash and at 134.50 for end of month. The Obligations were firm at 14.50. Bolsa Bank Shares changed hands at 56.50 for 50 o/o Scrip. In Cedulas, only the Provincial series were dealt in, quotations having apparently settled down at what may be considered very low prices indeed for the interest paid by the stock. If Governor Paz took this Cedula question vigorously in hand, there would be a booming recovery in the series, which in the present state of affairs inspire investors with a minimum of confidence and cost the mortgagers a ruinous rate, of, say, nearly 14 p.c. for the money. An 8 p.c. stock like O at 25 p.c. discount is a menace to the whole system, and calls for radical measures.

Although money is reported rather tight in the market, it is by no means so tight as many people suppose, and it is no less certain that if it is difficult now to start a new bank or other similar financial business, capital is to be had in abundance for other concerns. As a case in point, we know of a colonizing company started within those days, when the cry of tight money is as loud as ever, yet the two million dollars capital have been covered as if by magic, and the first calls promptly responded to, A property in Entre Rios has been purchased for 1,200,000 dollars cash, and a large tract of country in Santa Fe is in treaty for. The names are kept in reserve, and no further particulars are published as yet, but in a few days the whole business will be made public. The above shews that for genuine business enterprise there is no lack of money.

Mr. Crosbie, agent of the great firm of Messrs. Punchard, McTaggart, Lowther and Co., was welcomed on 'Change to-day on his arrival from Europe. Mr. Crosbie is connected with the Buenos Aires Metropolitan Tramways Company, which will run from the Boca de Riachuelo and its vicinity to the Plazas Constitucion and Once, the Recoleta, Palermo Park, and return by the eastern side of the town to the Boca. At the end of the year this tramway will be completed. The "concessionaire" is Mr. P. Harilaos; the capital of the Company is £450,000. The engineer of the Company is Sir George Bruce.

Mr. Dawney, so favourably known all over the Plate, was welcomed to-day after an absence of seven months. He arrived from Europe in the R.M.S. Atrato and reports Argentine credit in Europe more flourishing than ever. Any sound enterprise will get all the money required in a few hours. Never was the credit of the Government in such a flourishing condition as at present. People in England are beginning to find out that the Argentine Republic is not only one of the best fields for investment, but also one of Great Britain's very best customers. Mr. Dawney is now representative of Sir George Bruce, the President of the Institute of Civil Engineers, and engineer of the Metropolitan Tramway Co.

The premises of Mr. Pedro A. Costa's Granja Nacional are nightly crowded. Many go to see the exhibition of pictures: others make the resort a familiar rendezvous where the leading lights of the city meet. The development of this auctioneering firm is something marvellous. The firm now occupies the old precints of the Strangers' Club and the very valuable property opposite, and the auctioneering business embraces every article of the world's manufactures.

The Finance Office to-day handed the Credito Publico $546,383 for half-yearly service of 1887 bonds.

Advices from Bahia Blanca report the Sauce Grande and Naposta Chico have overflowed their banks and invaded some of the streets of Bahia Blanca. The Colorado is also very swollen; and continues rising.

The Rural Society has commissioned Mr. Charles Bejer to make a map of the Republic, setting forth the areas of land under tillage as compared with those held as grasing lands, the latter being so set forth as to shew the exact degree in which they are stocked.

By printer's error the name of the seller of the La Laguna estancia in South Barracas, fronting on the Riachuelo, appeared as Portland. Mr. Peter Gartland is the lucky seller, and the buyers are Messrs. Mones Cazon, Mr. Calandrelli, Maffey and Martinez.

The drawing of Banco Constructor Obligations took place to-day on the bank's premises in presence of the usual motley assemblage of holders, and with the following results:—

The business of the second hour was most important, although almost entirely confined to the sovereign stock. Little or nothing was done in other values, and although shares all round are firm it seems as if National Bank shares will monopolise attention during the month. With regard to the quotations of the latter stock they boomed so heavily that there can be no longer any doubt that the speculation is now for a rise. All the leading bears have turned round and are covering their operations. The outsiders have chimed in, and perhaps before many days have passed this stock will reach a 260 quotation again. For end of month 14,600 shares were picked up, opening at 253.50, the closing rate of the morning, fluctuating between 255 and 254.50 for some time, then advancing to 256.50 and closing a half point lower, with buyers all round. In Cédulas the Provincial series were most dealt in, and of these only O was in much demand; rates ruled the same as in the morning. Credito Real and Constructors kept firm, and everything else was neglected.

The following is a summary of operations effected this evening at the second ring:—

National Bank Shares—
May 31st 14,600 at 253.50-255 254.50-256.50-256

May 16th N 45,500 at 76.20-30
May 16th O 181,000 at 75.10-40-20

At the close of the hour several operations in National Bank shares were effected at 256.50, and it is reported that there are no sellers now under 257, and few at this rate. The differences are so heavy already on the month that they might be considered menacing, but brokers report that the bears have been buying very heavily during the past few days, so that the liquidation will be more or less an easy task.

Gold ruled during the day at about an average figure of 157.50. In the evening it closed about 10 cents higher, but the tendency is supposed to be rather for decline than advance, and a sale of gold for large amount house upon house was effected today at 157.70, and for July, which shews that fears of any stiff advance are now practically over.

Exchange rules firm and is quoted in the market at 47½-¾d.

The advance of the Obras shares in the Mount was much discussed in the hall to-day, and parties who formerly would not have put a cent in the stock now think of investing. They rose to-day to 109 for cash and are still booming.

The s.s. Garrick, Lamport and Holt line, arrived last night in Montevideo with Liverpool dates to 15th April; she will be up on Friday with 3370 tons of cargo.

The s.s. Buffon, same line, arrived last night in Montevideo with London dates of 15th April and 2,500 tons cargo.

Messrs E. Zimmermann and Co., brokers, report the following two important sales effected: Dr. Lausen's camp in 9 de Julio and known as Los Algorobos, 9 leagues, wired in, for 700,000 dollars cash, stock and everything included, buyers Messrs Mansi, Aguilar, Franco and Michenberg. The second is the sale of the Estancia Espartillarcito, 6 leagues, in Carhué, wired in, stock, etc., included, for £52,500 sterling cash, seller Mr. John Fair, and buyer Mr. Fermin Ocampo. It is said that both properties are purchased to be put under tillage.

The Minister of Finance accepted to-day the offer of Messrs. S. B. Hale and Co. for account of Messrs. Baring Bros., of London, of half a million sterling in bills on London. The advance is made on account of the lease of the City Improvement Works of this city. The rate of interest which the Government has to pay for the advance has not yet been fixed.

The National Bank granted gold to-day to the amount of 74,947 m/n, at 58 to 57.10 o/o premium.

The President of the Republic held a lengthy Cabinet Council to-day. It was resolved that the Government Message and financial bills of Minister Varela should be sent to Congress this week. The market is on the "qui vive!"

Minister Varela has appointed our esteemed colleague Mr. Leon Walls special commissioner at the Paris Exhibition, to report on all financial and monetary questions. Mr. Walls is expected to report in detail on all conferences that may be held on financial matters in Paris, and to give his opinion on the best monetary systems.

To-day was a Catalinas mole-head day, nearly 2,000 muscular immigrants with all the customary paraphernalia disembarking from the German packet Baltimore and French packet Cordoba. It is satisfactory also to note that splendid material as the Italian element makes for labour, there is now a considerable mixture of other races, which will tend to retard the preponderance of Italians.

The Governor of the Province signed the decree yesterday for instalment of the Jury for appeals against the "contribucion" tax in the Revenue Office. The Jury will sit from 20th May to 20th June.

Another decree from same source made its appearance, clearing up the doubtful point whether "centro agricola" concessions are liable to the "contribucion directa" tax. The decree declares them liable until the chacras are actually in working order, or unless the "concessionaire" farms the lands himself under the provisions of the Act.

The following transactions in real-estate are reported:—
